

BIO GRAFFITI REMOVER

£10.04 + VAT PER LITRE

DESCRIPTION:

Bio Graffiti Remover is a biodegradable solvent contrived for removing pigmented traces (ink, polymers, graffiti etc.) It provides a safe to use and environmentally friendly product for the removal of most types of commonly met graffiti

USES:

Bio Graffiti Remover will treat spray paint, felt-tip pen, some oil based paints and water based paints.

Safe to use on all masonry, metal and glass surfaces. It can be used (with care) to remove some spray paints off normal gloss (oil based) paint. Bio Graffiti Remover has a slow reaction time, making it manageable on most surfaces. It is also an ideal chewing gum remover from most surfaces.

Coverage is dependent on surface but most porous surfaces will give you a coverage rate of 7 to 9 square metres per litre. This equates to a coverage cost of about £1.00 per square metre.
