

GUM MAGIC PROTECTION

DESCRIPTION:

Gum Magic Protection is an aqueous fluorochemical dispersion. It prevents penetration of water, liquids, oil and most types of surface contamination (including chewing gum) to porous masonry substrates.

CHARACTERISTICS:

- Transparent – will not alter the aesthetics of the treated surface
- Atmospheric contaminants no longer stick to the surface
- Resists moss and lichen formation
- Keeps surfaces looking natural and clean
- Surface will remain moisture vapour permeable
- Reduces surface degradation
- UV resistant
- Non-flammable
- Non-toxic
- Environmentally friendly

Coverage: Gum Magic is a wet-on-wet application which will give an average coverage of about 12 square metres per litre.
