

GRAFFITI MAGIC

- * Long Term Protection
- * Easy Cleaning
- * Easy Application

Graffiti Magic is a unique **One Pack Coating** which gives effective protection against graffiti of all types on **concrete, brick, render, stone, timber, metal and previously painted surfaces.**

Once a surface is treated with two coats of Graffiti Magic, the graffiti is **simply removed with soapy water.**

Rough areas will need the use of a soft bristle brush, or for larger areas a warm water pressure wash. There is **no other system** which allows such easy cleaning and is **non-sacrificial** – which means that you can **clean the surface again and again** without damaging the coating!!

As Graffiti Magic is a **clear coating**, the surface it treats needs to be clean or satisfactorily decorated prior to treatment.

The coating, correctly applied, has an **expected life of ten years**

(Please note – light coloured surfaces like natural stone may darken slightly when treated. A pre-treatment of Graffiti Magic Non Darkening Sealer will minimise this effect.)

Graffiti Magic has been **successfully employed for over ten years** on major supermarkets, public buildings and monuments and a wide variety of other projects in both the private and public sectors, both **at home and overseas.**
